May 2009

Chaos: a "cryptic form of order"; everything connected to everything

Learning may reside in non-human appliances

Node: Field

Weak ties: short connections between information

Node: You with knowledge distributed across your brain

Node: Field

Nebulous environments of shifting core elements

Siemens (2005)

...and knowledge rests in a diversity of opinions.

Learning....

... is a process of connecting specialized nodes or information sources.

Decision-making is a learning process. Choosing what to learn, the meaning of incoming information...

... may reside in non-human appliances

Core skills: ability to see connections, nurture and maintain connections for continual learning.

Goal: current, accurate, up-to-date knowledge.

Siemens (2005)

Distributed or Connective Knowledge

Openness

A mechanism allows all perspectives to enter into the system, be heard and interacted with by others

Diversity

Widest possible spectrum of view points

Interactivity

Knowledge produced is the product of the interaction, not just an aggregation

Autonomy

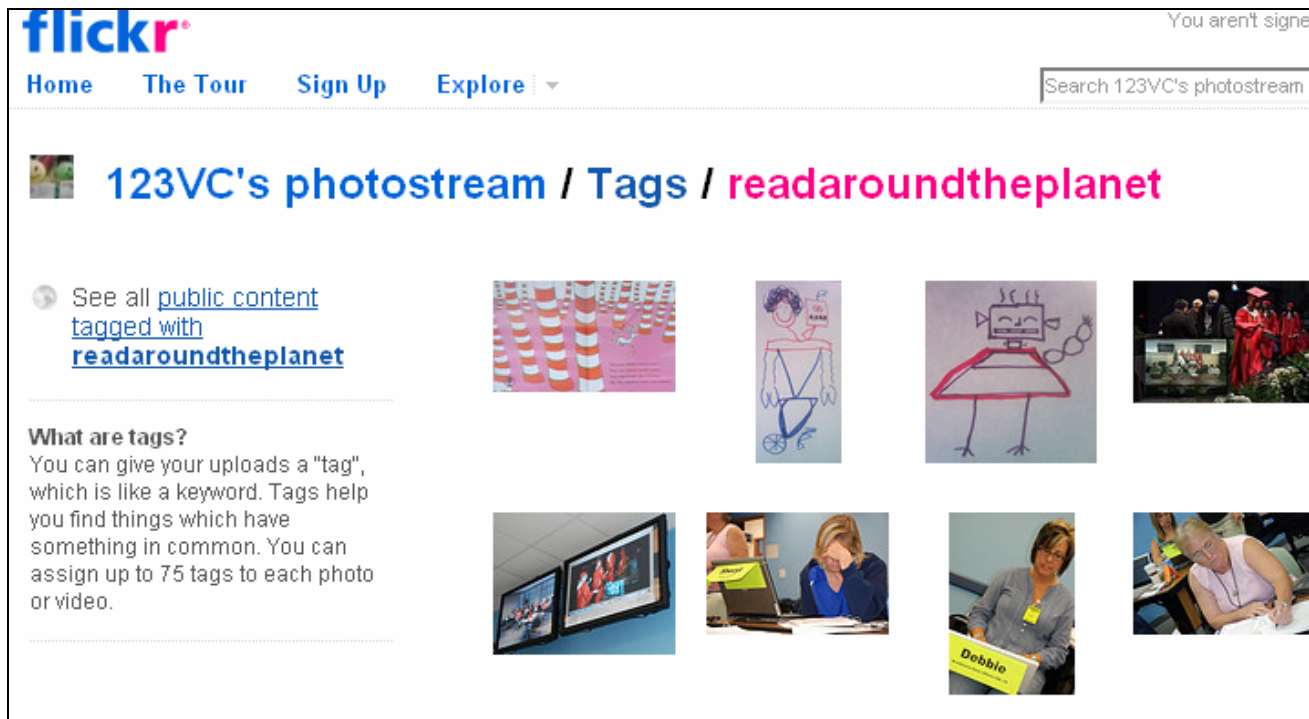

Individual knowers contributing on their own accord according to their own knowledge, values, decisions

Example of Learning in Non-Human Appliances

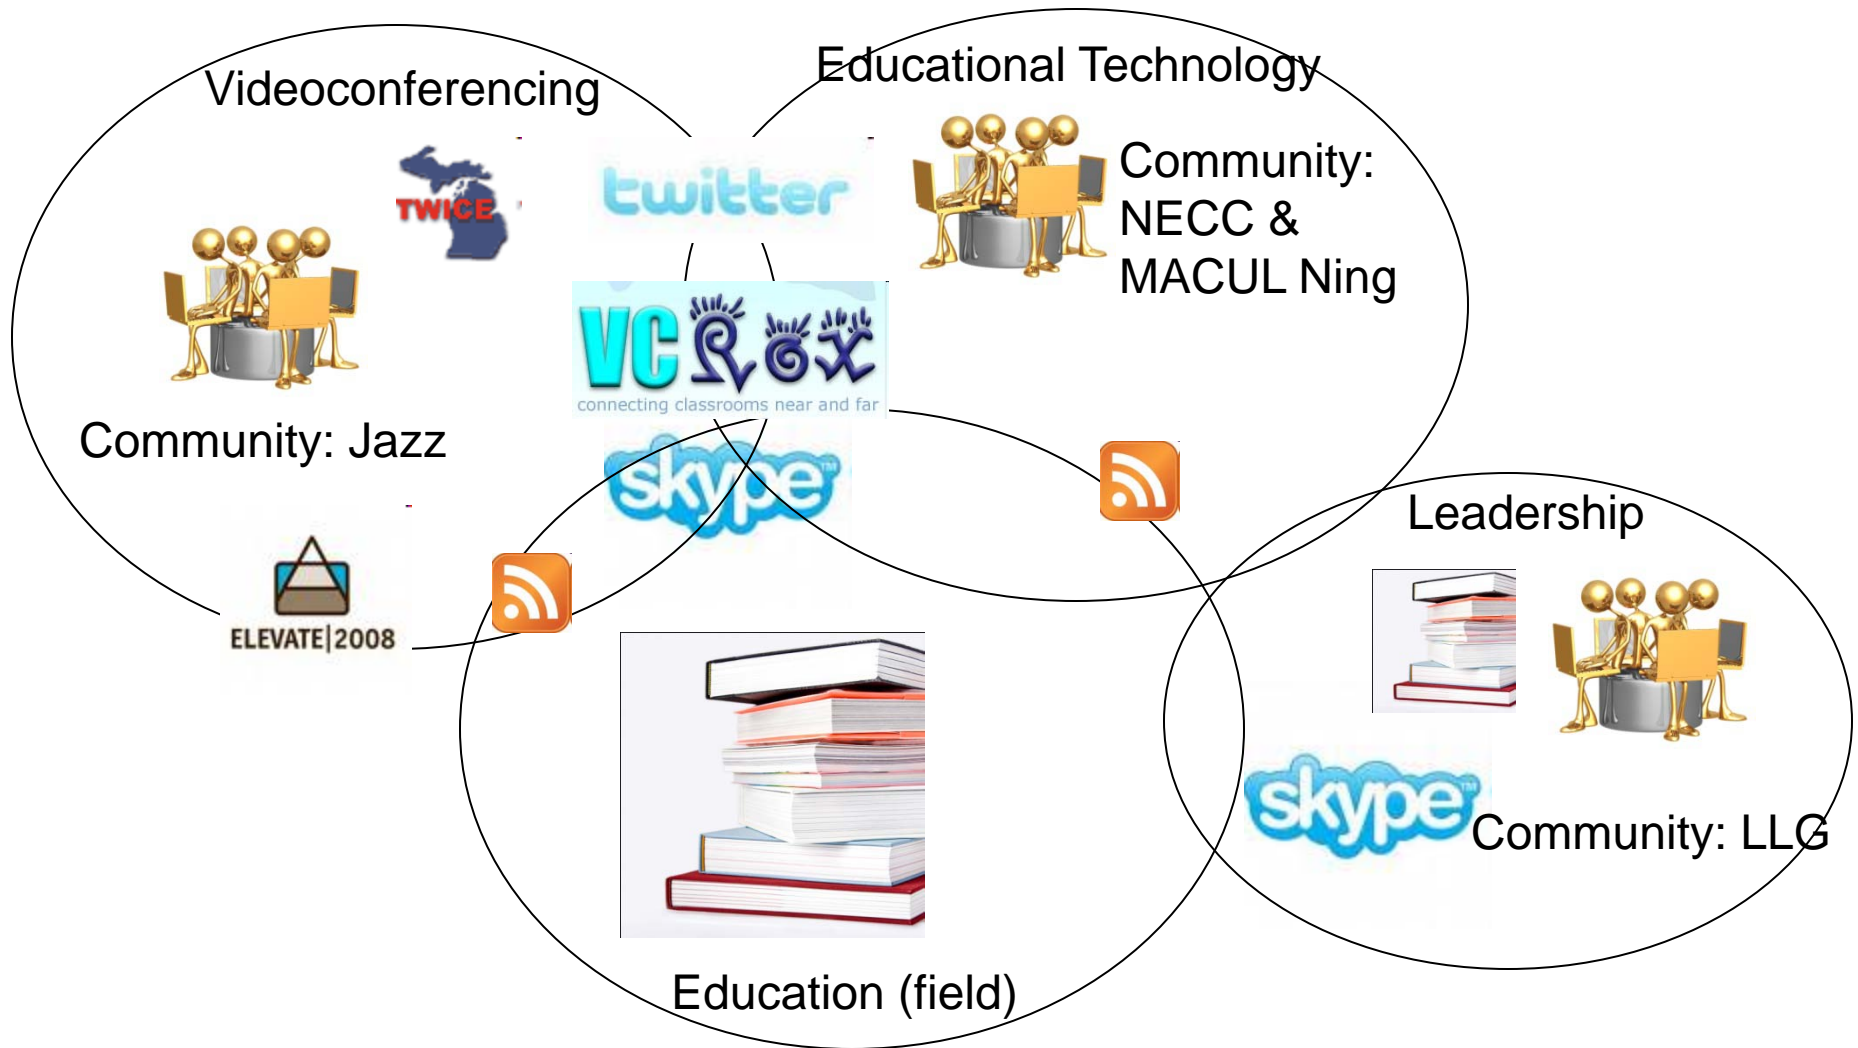

“Rapid knowledge growth requires off-loading the internal act of cognition, sense and meaning making, and filtering to a network consisting of human and technology nodes.”

“The popular tag feature of many sites (del.icio.us, digg.com, flickr), enable pattern recognition that captures the activities of thousands or millions of individuals. As knowledge complexifies, patterns, not individual elements, become of greatest importance in gaining understanding.”

The screenshot shows the Flickr interface for '123VC's photostream'. The page title is '123VC's photostream / Tags / readaroundtheplanet'. A search bar contains the text 'Search 123VC's photostream'. Below the title, there is a link to 'See all public content tagged with readaroundtheplanet'. A section titled 'What are tags?' explains that tags are keywords used to find related content. The main area displays a grid of photos, including a striped pattern, a hand-drawn robot, a graduation ceremony, a person at a computer, and a person holding a sign that says 'Debbie'.
